2023 SEED CATALOG

OUR PROMISE

FAMILY-TO-FAMILY FARMING

Axis Seed™ is one of the fastest-growing independent seed companies in the U.S. because of our unique business model. Through local, family-owned Independent Regional Companies (IRCs), you have access to the latest genetics, traits, and technologies, backed by people who genuinely care about your success. What you can expect is a dedicated partnership where you receive premium products selected for your specific soil and profit goals. Because even as the industry evolves with new technologies, success will always come from the relationship—and our family wants to see your family succeed.

Working with Axis is unlike your relationship with any other company, and it won't take long to see why.

Grow Strong®

SEEDSYNC®

WHY USE SEEDSYNC?

SeedSync doesn't use nationwide algorithms to push a popular, new, or surplus seed. With its new, user-friendly interface, SeedSync performs an analysis that's exclusive to your soil's needs.

MAXIMIZE YOUR ROI BY OPTIMIZING EVERY ACRE

WE ARE ONE OF THE FASTEST GROWING SEED COMPANIES IN THE INDUSTRY.

- We downsize a geography into Independent Regional Seed Companies (IRCs) of Axis Seed.
- We allow IRCs to select genetics that have specific adaptation to a selling area, and not be forced to sell mediocre product.
- We adapt to new technologies and genetics quickly.
- We allow access to traits/genetics/treatments from a multitude of sources, allowing diversity and ability to deliver more options to Axis growers.
- We provide more information on specific genetics and traits, and how/where they will perform in this local geography because of first-hand experience and knowledge.

SEED TREATMENT
THAT NATURALLY
JUMP-STARTS YOUR
SEEDLING VIGOR

AVAILABLE APPLICATIONS:

- NutriBolt
- NutriBolt Liquid Calcium

CORN BRANDS

Your soil is unique.
Get more from it with
select hybrids.

48M28 VT2PRIB 97-99 Day Maturity

- Good trend for yield-to-moisture analysis
- Good upper end yield potential with high management
- Stature suggests dual purpose potential
- Very good stalks

49N23 VT2PRIB 98-100 Day Maturity

- Very strong yield potential over a very wide geography east to west
- Semi-flex ear type should help encourage use at lower plant populations and good stress tolerance for stress acres
- Good foliar health and late-season plant appearance
- Excellent dry down and very good early plant vigor and intactness

53P21 VT2PRIB 102-104 Day Maturity

- Very good stalks and roots with excellent test weight
- Excellent early vigor for minimum tillage and early planting
- Widely adapted product with very good Goss' Wilt tolerance and low greensnap risk
- Long ears with good kernel depth adds to the fall appearance

ALSO AVAILABLE: 53P51 SSRIB

57D23 DGVT2PRIB 106-108 Day Maturity

- Very good greensnap and Goss' Wilt tolerance for the west
- Strong stress tolerance and very good ear flex should allow for use on tougher acres
- Best performance in 2019 was in central and east
- Great early plant vigor on this product

58M23 VT2PRIB 107-109 Day Maturity

- Strong yield potential
- Excellent root rating
- Very good stalk health to aid in standability
- Best positioned to avoid excessively wet soil types

59P59 SSRIB 108-110 Day Maturity

- Strong yield performance east to west
- Excellent dry down with very good early plant vigor
- Best fit in higher yielding soil types
- Great greensnap resistance and good intactness

NEW! 59R27 VT2PRIB 108-110 Day Maturity

- Exceptional yield performance
- Very good greensnap tolerance but avoid fields with heavy Goss' Wilt
- Will respond well to fungicide use
- Best when positioned on well-drained soils

60D24 VT2PRIB 109-111 Day Maturity

- Very good stalks and roots in a medium statured product
- Good stay green and fall appearance
- Works well in poorly drained soil types
- Very good test weight

60T50 SSRIB 109-111 Day Maturity

- Strong top-end yield with a compact plant type
- Strong agronomics in stalks, roots and greensnap
- Limit stress acre placement as ear placement lowers
- Great test weight with solid early plant vigor

62V29 VT2PRIB 111-113 Day Maturity

- Ear flex aids in utilization on tough acres
- Robust disease package
- Very nice fall appearance and stay green
- Strong stalks and roots

ALSO AVAILABLE: 62V59 SSRIB - NEW!

NEW! 62T57 SSRIB 111-113 Day Maturity

- Consistent, semi-fixed ears with large, thick kernels
- Showy hybrids that hides yield, very good corn following corn
- Excellent disease package for GLS, NLB and Goss' Wilt
- Solid agronomics overall

63H57 SSRIB 112-114 Day Maturity

- Strong performance on highly productive soils
- Good northern movement
- Well adapted for the Central and Eastern corn belt
- Very good root and stalk ratings

63P55 SSRIB 112-114 Day Maturity

- Strong performance over a wide geography
- Semi-flex ear type will allow for a wide range of planting populations
- Responds favorably to fungicides and irrigation
- Very good early plant vigor

63Z23 VT2PRIB 112-114 Day Maturity

- Strong central performance with good southern movement
- Semi-flex ear with very good test weight
- Strong late-season standability
- Very good stalk and root ratings

NEW! **63W23** DGVT2PRIB 112-114 Day Maturity

- Very attractive plant with impressive fall appearance
- Produces girthy ears with tremendous kernel flex, size and depth
- Very strong overall disease package
- Optimal performance in moderate to high yield environments

SOYBEAN BRANDS

The truth is, there's no "average acre." So why choose an average bean variety?

NEW! *2313E*

E3

2.3 Relative Maturity

- Good SDS and IDC tolerance
- Very good emergence
- Very good stress tolerance

2402ES

E3

2.4 Relative Maturity

- High yield on this product
- Excellent stress tolerance
- Above average SDS resistance completes the package

NEW!

2633E

E3

2.6 Relative Maturity

- Medium-tall height plant with very good standability
- SCN + BSR + Rps 1c
- Good SDS and IDC

2902E

E3

2.9 Relative Maturity

- Great emergence and stress tolerance
- Two years worth of good field notes
- Attractive gray/brown

2212XF

XF

2.2 Relative Maturity

- Offensive product that works east to west
- Tall variety that has above average standability
- IDC is average and WM is below average, need to position carefully

2412XF

XF

2.4 Relative Maturity

- Above average defensive package
- Medium-tall hybrid with great standability
- Great plant style to cover all soil types and yield environments at 2.4

NEW!

2533XF

XF

2.5 Relative Maturity

- Great performance across soil types and regions
- SCN + BSR + Rps 1c
- Very good emergence and stress tolerance

NEW!

2833XFS

XF

2.8 Relative Maturity

- SCN + BSR + Rps 1c
- Good SWM and IDC
- STS tolerance

3002XF

XF

3.0 Relative Maturity

- Very good WM resistance and above average SDS tolerance
- Good standability with this tall plant type product
- Good movement from east to west segments

Think Before You Bin Run

Verification Required The last patent on the original Roundup Ready® soybean trait expired a few years ago and U.S. farmers may legally plant saved seed from some varieties of soybean containing the Roundup Ready® soybean trait. However, it is important that you check with your seed supplier to determine if a specific Roundup Ready® soybean variety is covered by other intellectual property rights, and if so, the policy for saving seed of that variety.

Higher Seeding Rate A higher seeding rate may be required for bin-run Roundup Ready® soybeans compared to new branded seed.

Yield Loss Roundup Ready 2 Yield® soybean, Roundup Ready 2 Xtend® soybean, and XtendFlex® soybean varieties typically have a higher yield opportunity than Roundup Ready® soybean varieties.

Cleanout Loss Loss of seed and/or shrink occurs during the seed cleaning and handling processes for bin-run seed.

Seed Treatment Costs Treating your seed will add costs—both the cost of the treatment and the application of that treatment.

Lost Income Every bushel of saved seed you plant is a bushel you're not selling as commodity grain.

Increased Seed Management If you plan to save and bin-run Roundup Ready® soybeans for planting, you will have to manage your harvest operations and grain storage so that the seed isn't co-mingled with other seed that's covered by intellectual property rights.

High Value of New Branded Seed

Latest Technology

- // High-yielding soybean technologies
- // Better variety options
- // Leading seed treatment options

Customer Service

- // Dealer agronomic support before and after the sale
- // Replant policy support
- // Convenient packaging and delivery

Reliable Germination and Quality

- // Rigorously tested and meets U.S. Federal Seed Act requirements
- // Free of seed-borne diseases
- // Properly stored and conditioned

For a list of Bayer's trait patents go to cs.bayerpatents.bayer.com

For questions regarding seed intellectual property, or to anonymously report a saved seed tip, you can contact Bayer in the following ways:

1. Call 1-866-99-BAYER
2. Send a letter: Trait Stewardship, 622 Emerson Road, Suite 150, Creve Coeur, MO 63141
3. Submit a contact request at cropsience.bayer.us/contact or scan the QR code

Bayer is a member of the Seed Innovation and Protection Alliance. Visit www.seedipalliance.com to learn more. SIPA™ is a trademark of the Seed Innovation and Protection Alliance.

Bayer is a member of Excellence Through Stewardship® (ETS). Bayer products are commercialized in accordance with ETS Product Launch Stewardship Guidance, and in compliance with Bayer's Policy for Commercialization of Biotechnology-Derived Plant Products in Commodity Crops. Commercialized products have been approved for import into key export markets with functioning regulatory systems. Any crop or material produced from this product can only be exported to, or used, processed or sold in countries where all necessary regulatory approvals have been granted. It is a violation of national and international law to move material containing biotech traits across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. Excellence Through Stewardship® is a registered trademark of Excellence Through Stewardship.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. It is a violation of federal and state law to use any pesticide product other than in accordance with its labeling. NOT ALL formulations of dicamba or glyphosate are approved for in-crop use with Roundup Ready 2 Xtend® soybeans. NOT ALL formulations of dicamba, glyphosate or glufosinate are approved for in-crop use with products with XtendFlex® Technology. ONLY USE FORMULATIONS THAT ARE SPECIFICALLY LABELED FOR SUCH USES AND APPROVED FOR SUCH USE IN THE STATE OF APPLICATION. Contact the U.S. EPA and your state pesticide regulatory agency with any questions about the approval status of dicamba herbicide products for in-crop use with Roundup Ready 2 Xtend® soybeans or products with XtendFlex® Technology.

Roundup Ready® Technology contains genes that confer tolerance to glyphosate. **Roundup Ready® 2 Technology** contains genes that confer tolerance to glyphosate. **Roundup Ready 2 Xtend® soybeans** contain genes that confer tolerance to glyphosate and dicamba. **Products with XtendFlex® Technology** contain genes that confer tolerance to glyphosate, glufosinate and dicamba. **Glyphosate** will kill crops that are not tolerant to glyphosate. **Dicamba** will kill crops that are not tolerant to dicamba. **Glufosinate** will kill crops that are not tolerant to glufosinate. Contact your seed brand dealer or refer to the Bayer Technology Use Guide for recommended weed control programs.

Contact your Bayer retailer, refer to the Bayer Technology Use Guide, or call the technical support line at 1-888-283-6847 for recommended Roundup Ready® Xtend Crop System weed control programs.

A CLOSER LOOK AT THE ENLIST® WEED CONTROL SYSTEM

2,4-D choline | Glyphosate | Glufosinate

Following burndown, Enlist Duo® and Enlist One® herbicides with Colex-D® technology are the only herbicides containing 2,4-D that are labeled for preemergence and postemergence use with Enlist E3® soybeans.

On-Target Application

- 90% less drift than traditional 2,4-D
- 96% less volatile than 2,4-D ester

- Convenient proprietary blend of 2,4-D choline and glyphosate
- The two modes of action work together to deliver control of yield-robbing weeds and help prevent resistance

- Straight goods 2,4-D choline with additional tank-mix flexibility
- Provides additional tank-mix flexibility with Durango® DMA® herbicide, Liberty® herbicide and other qualified tank-mix products, allowing for a customized weed control program to fit each farm

B.t. products may not yet be registered in all states. Check with your representative for the registration status in your state.

IMPORTANT IRM INFORMATION: RIB Complete® corn blend products do not require the planting of a structured refuge **except** in the Cotton-Growing Area where corn earworm is a significant pest. SmartStax® RIB Complete® corn blend is not allowed to be sold for planting in the Cotton-Growing Area. **See the IRM/Grower Guide for additional information. Always read and follow IRM requirements.**

DroughtGard® Hybrids with RIB Complete® corn blend the refuge seed may not always contain DroughtGard® Hybrids trait.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. Roundup Ready technology contain genes that confer tolerance to glyphosate, an active ingredient in Roundup® brand agricultural herbicides. Agricultural herbicides containing glyphosate will kill crops that are not tolerant to glyphosate.

Performance may vary from location to location and from year to year, as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of these conditions on the grower's fields.

ALWAYS READ AND FOLLOW PESTICIDE LABEL DIRECTIONS. It is a violation of federal and state law to use any pesticide product other than in accordance with its labeling. NOT ALL formulations of dicamba, glyphosate or glufosinate are approved for in-crop use with products with XtendFlex® Technology. ONLY USE FORMULATIONS THAT ARE SPECIFICALLY LABELED FOR SUCH USES AND APPROVED FOR SUCH USE IN THE STATE OF APPLICATION. Contact the U.S. EPA and your state pesticide regulatory agency with any questions about the approval status of dicamba herbicide products for in-crop use with Roundup Ready 2 Xtend® soybeans or products with XtendFlex® Technology.

Products with XtendFlex® Technology contains genes that confer tolerance to glyphosate, glufosinate and dicamba. Glyphosate will kill crops that are not tolerant to glyphosate. Dicamba will kill crops that are not tolerant to dicamba. Glufosinate will kill crops that are not tolerant to glufosinate. Contact your seed brand dealer or refer to the Bayer Technology Use Guide for recommended weed control programs.

Acceleron®, DroughtGard®, RIB Complete and Design®, RIB Complete®, Roundup Ready 2 Technology and Design®, Roundup Ready®, Roundup®, SmartStax and Design®, SmartStax®, Trecepta®, Trecepta® RIB Complete®, VT Double PRO®, Roundup Ready 2 Xtend®, Roundup Ready 2 Yield®, Roundup Ready PLUS®, SR and Design®, TruFlex®, VaporGrip®, XtendFlex® and XtendiMax® are trademarks of Bayer Group. LibertyLink® and the Water Droplet Design® are registered trademarks of BASF Corporation. Herculex® is a registered trademark of Corteva AgroSciences LLC. Agrisure Viptera® is a registered

trademark of Syngenta. Respect the Refuge and Corn Design® and Respect the Refuge® are registered trademarks of National Corn Growers Association. All other trademarks are the property of their respective owners.

Seed containing a patented trait can only be used to plant a single commercial crop. It is unlawful to save and replant Roundup Ready 2 Yield® soybeans, Roundup Ready 2 Xtend® soybeans, and XtendFlex® soybeans. Additional information and limitations on the use of these products are provided in the Technology Stewardship Agreement and the Bayer Technology Use Guide: tug.bayer.com. U.S. patents for Bayer technologies can be found at the following webpage: cs.bayerpatents.bayer.com

Seeds containing the Enlist, Herculex and PowerCore traits are protected under numerous US patents. Seeds containing patented traits can only be used to plant a single commercial crop and cannot be saved or replanted. You acknowledge and agree to be bound by the terms and conditions of the following documents in effect at the time of planting of this seed: (i) the Technology Use Agreement and (ii) the Product Use Guides for all technologies in this seed, including the Herbicide Resistance Management (HRM), and Use requirements detailed therein (www.corteva.us/Resources/trait-stewardship.html). To plant Enlist, Herculex and PowerCore seed, you must have a limited license from Corteva Agriscience. In consideration of the foregoing, Corteva Agriscience grants to the Grower the limited license to use its technology to produce only a single commercial crop in the United States under the terms and conditions set forth in the Technology Use Agreement in effect at the time of planting of this seed. Always read and follow herbicide label directions prior to use: Enlist® products contain the Enlist trait that provides crop safety for use of labeled over-the-top applications of glyphosate, glufosinate and 2,4-D herbicides featuring Colex-D® technology when applied according to label directions. Following burndown, the only 2,4-D containing herbicide products that may be used with Enlist™ crops are products that feature Colex-D technology and are expressly labeled for use on Enlist crops. 2,4-D products that do not contain Colex-D technology are not authorized for use in conjunction with Enlist products. Enlist corn contains genes that confer tolerance to 2,4-D and -fop herbicides. 2,4-D and -fop herbicides will damage or kill crops that are not tolerant to 2,4-D or -fops.

Enlist E3® soybean seeds containing the Enlist® trait can only be used to plant a single commercial crop. It is unlawful to save and replant Enlist E3® soybeans. Additional information and limitations on the use of these products are provided in the Corteva Agriscience Technology Use Agreement and Enlist® Soybean Product Use Guide. U.S. patents for Dow AgroSciences technologies can be found at the following webpage: www.corteva.us/Resources/trait-stewardship.html.

Corteva Agriscience is a member of Excellence Through Stewardship® (ETS). Corteva Agriscience products are commercialized in accordance with ETS product launch stewardship guidance and Dow AgroSciences Product Launch Stewardship Policy. No crop or material produced from this product can be exported to, used, processed or sold across boundaries into nations where import is not permitted. Growers should talk to their grain handler or product purchaser to confirm their buying position for this product. For further information about your crop or grain marketing options, contact DAS at 877-4-TRAITS (877-487-2487). Information regarding the regulatory and market status of agricultural biotechnology products can be found at: www.biotradestatus.com.

The transgenic soybeans event in Enlist E3® soybeans is jointly developed and owned by Corteva Agriscience and M.S. Technologies, L.L.C. *™Enlist, Enlist E3, the Enlist E3 logo, and Colex-D are trademarks of Corteva Agriscience.
